
Anti-Pseudocowpox Virus PCPV_gp007 Monoclonal Antibody (MP-K2223) (Mouse IgG)

Cat: MPYF-1122-KX1423

This product is for research use only and is not intended for diagnostic use.

The antibody customized production platform is used to screen the mouse monoclonal antibodies with at least 5 synthetic peptides of Pseudocowpox Virus PCPV_gp007. The mAb with highest affinity will be selected. The selected antibody recognizes Pseudocowpox Virus PCPV_gp007. The isotype is Mouse IgG. It can be used in applications: WB (Other applications need to be tested.).

Product Description

Target	PCPV_gp007
Species Reactivity	Pseudocowpox Virus
Strain	VR634
Cross Reactivity	PCPV_gp007
Specificity	This antibody recognizes monkeypox virus (MPXV) PCPV_gp007.
Antibody Isotype	Mouse IgG
Clone	MP-K2223
Clonality	Monoclonal Antibody
Purity	≥95% (SDS-PAGE)
Purification	Purified by Protein A/G chromatography.
Applications	WB (Other applications need to be tested.)
Buffer	PBS, pH 7.4
Storage	Store at 4°C for short term (1 week), store at -20°C to -80°C for long term (1 year). Avoid repeated freeze-thaw cycles.

Target

Target	PCPV_gp007
Gene Name	PCPV_gp007
Introduction	PCPV belongs to the family of poxviruses, which includes several members of the virus with economic impact. PCPV has a linear double-stranded DNA genome of 145 kb in length with high GC content and 134 open reading frames (ORFs). The PCPV linear genome contains central and terminal regions. The central region is

responsible for expressing structural proteins and factors related to viral proliferation while the two terminal regions are closely related to genes related to virulence factors.

Alternative Names PCPV_gp007; Ankyrin/F-box protein

Official Symbol Ankyrin/F-box protein

Gene ID [8797208](#)

UniProt ID [D3IZF2](#)
