

Fowlpox Virus (NVSL) FPV149 Recombinant Protein

Made to Order

Cat: MPYF-1222-KX826

This product is for research use only and is not intended for diagnostic use.

This product is a made-to-order Fowlpox Virus (NVSL) FPV149 recombinant protein. The protein is for research use only and is not approved for use in humans or in clinical diagnosis.

Product Specifications

Target Protein	FPV149
Species	Fowlpox Virus
Strain	NVSL
Protein Class	Virology

Product Description

Expression Systems	Based on specific requirements
Protein Tag	Based on specific requirements
Protein Length	Full length
Protein Form	Soluble
Storage	Aliquot and store at -20°C or lower. For long term storage, we recommend to store at -70°C or lower. Avoid freeze/thaw cycles.

Target

Target Protein	FPV149
Full Name	hypothetical protein
Alternative Names	FPV149; hypothetical protein; similar to Fowlpox virus FPV149; The poxviridae are enveloped unsegmented dsDNA viruses; unlike many dsDNA viruses that replicate in the host nucleus poxviruses encode their own replication machinery and therefore replicate in the cytoplasm; viral genes are expressed in a bi-phasic manner with early genes encoding non-structural proteins involved in genome replication and late genes encoding the viral structural proteins; canarypox and fowlpox are members of the Avipoxvirus genus and infect nonmammalian hosts; Fowlpox virus infects chicken

s and turkeys while Canarypox has a broader host-range and infects passeriform (song) birds.

Gene ID	1486697
UniProt ID	Q9J581
